

**REMARKS**

This amendment is submitted supplemental to the amendment filed on May 26, 2010, which was not entered after a Final Rejection.

Amendments have now been made to clarify the claims, and overcome the objections raised in the Advisory Action.

It is noted that claim 13 now recites "placing sections of the duplicate together or sections of the duplicate with corresponding sections of the support means connected thereto in a holding device and determining with a sensor geometry of each duplicate or duplicate/support means section." Determining the geometry of the duplicate is thought to be supported by the specification in the last paragraph on page 2.

The referencing data may be found on either the duplicate section or on the base plate (support means). Claims 18-20 are directed specifically to referencing data on the base plate (support means), while claims 15-16 are directed to referencing data on the duplicate.

In addition, the last paragraph of claim 13 has been amended to clarify the step.

Applicants request a telephone interview with the Examiner before further action is taken in this application.

Respectfully submitted,

Ira J. Schultz
